

# Cardiac Implications of COVID-19 and Return to Play Recommendations for Pediatric Populations

Navy Lt. Movicque King, M.D., M.C.  
24 JUN 2021  
1355 - 1455

Navy Lt. Movicque King, M.D., M.C.  
PGY-3, Pediatrics  
Naval Medical Center Portsmouth

# Navy Lt. Movicque King, M.D., M.C.

Navy Lt. Movicque King, M.D. is a current PGY-3 Pediatrics Resident at Naval Medical Center Portsmouth (NMCP). She is a graduate of Georgetown University where she received her Bachelors of Science in Human Science from the School of Nursing and Health Studies and earned her medical degree from Eastern Virginia Medical School in 2016. After completing her intern year in Pediatrics at NMCP, she served as a General Medical Officer at the Department of Defense's (DoD) largest substance abuse rehabilitation program at NMCP for two years. During this time she also served as one of the Primary Care Providers for NMCP's Warrior Concussion Clinic participating in multi-disciplinary care of expeditionary forces with history of concussive exposure and traumatic brain injury (TBI) symptoms. LT King returned to residency in 2019 and has held many leadership positions within the residency program. After graduation, she will serve as a General Pediatrician, providing care to DoD dependent children and adolescents at Navy Medicine Readiness Training Unit (NMRTU) Kings Bay.

# Disclosures

- Navy Lt. Movique King, M.D. has no relevant financial or non-financial relationships to disclose relating to the content of this activity.
- The views expressed in this presentation are those of the author and do not necessarily reflect the official policy or position of the Department of Defense, nor the U.S. Government.
- This continuing education activity is managed and accredited by the Defense Health Agency ,J-7, Continuing Education Program Office (DHA, J-7, CEPO). DHA, J-7, CEPO, as well as all accrediting organizations, do not support or endorse financial or non-financial interest to disclose.
- DHA, J-7, CEPO, as well as activity planners and reviewers, have no relevant financial or non-financial interest to disclose.
- Commercial support was not received for this activity.

# Learning Objectives

At the conclusion of this activity, participants will be able to:

1. **Describe** unique presentations of SARS-CoV-2 in pediatric patients.
2. **Explain** known cardiac complications of COVID-19 in the pediatric population.
3. **Summarize** current American Academy of Pediatrics (AAP) recommendations on Return to Play after COVID-19 infection.

# SARS-CoV-2 (COVID-19)

- December 2019: Novel coronavirus first identified in Wuhan, China
- Person-to-person transmission via respiratory droplets
- Broad spectrum of illness severity from mild (upper respiratory infection) URI symptoms to severe acute respiratory distress syndrome (ARDS)

# COVID-19 in Children and Adolescents

7-9% of  
COVID-19  
infections  
are children

Lower  
rates of  
hospitalization

Similar viral  
loads as  
adults

Case  
counts  
steadily  
increasing

***“Medically Ready Force...Ready Medical Force”***

# COVID-19 Symptoms: Children vs. Adults

Note: Based on data for 11% of pediatric cases and 9.6% of adult cases reported as of April 2.  
Source: MMWR. 2020 Apr 6;69(early release):1-5

(CDC COVID-19 Response Team, 2020)

# COVID-19 Symptoms in Children

- Can be non-specific
- ~16% are asymptomatic
- Some present similarly to adults - respiratory failure, - myocarditis, - shock, - acute renal failure, - coagulopathy, and - multi-organ system failure.
- Intussusception and diabetic ketoacidosis have been reported
- Multisystem Inflammatory Syndrome in Children (MIS-C)

# Multisystem Inflammatory Syndrome in Children (MIS-C)

## April 2020

Children with cardiogenic shock/  
Kawasaki Disease (KD)-like presentations  
with SARS-CoV-2  
first reported

## Mid-May 2020

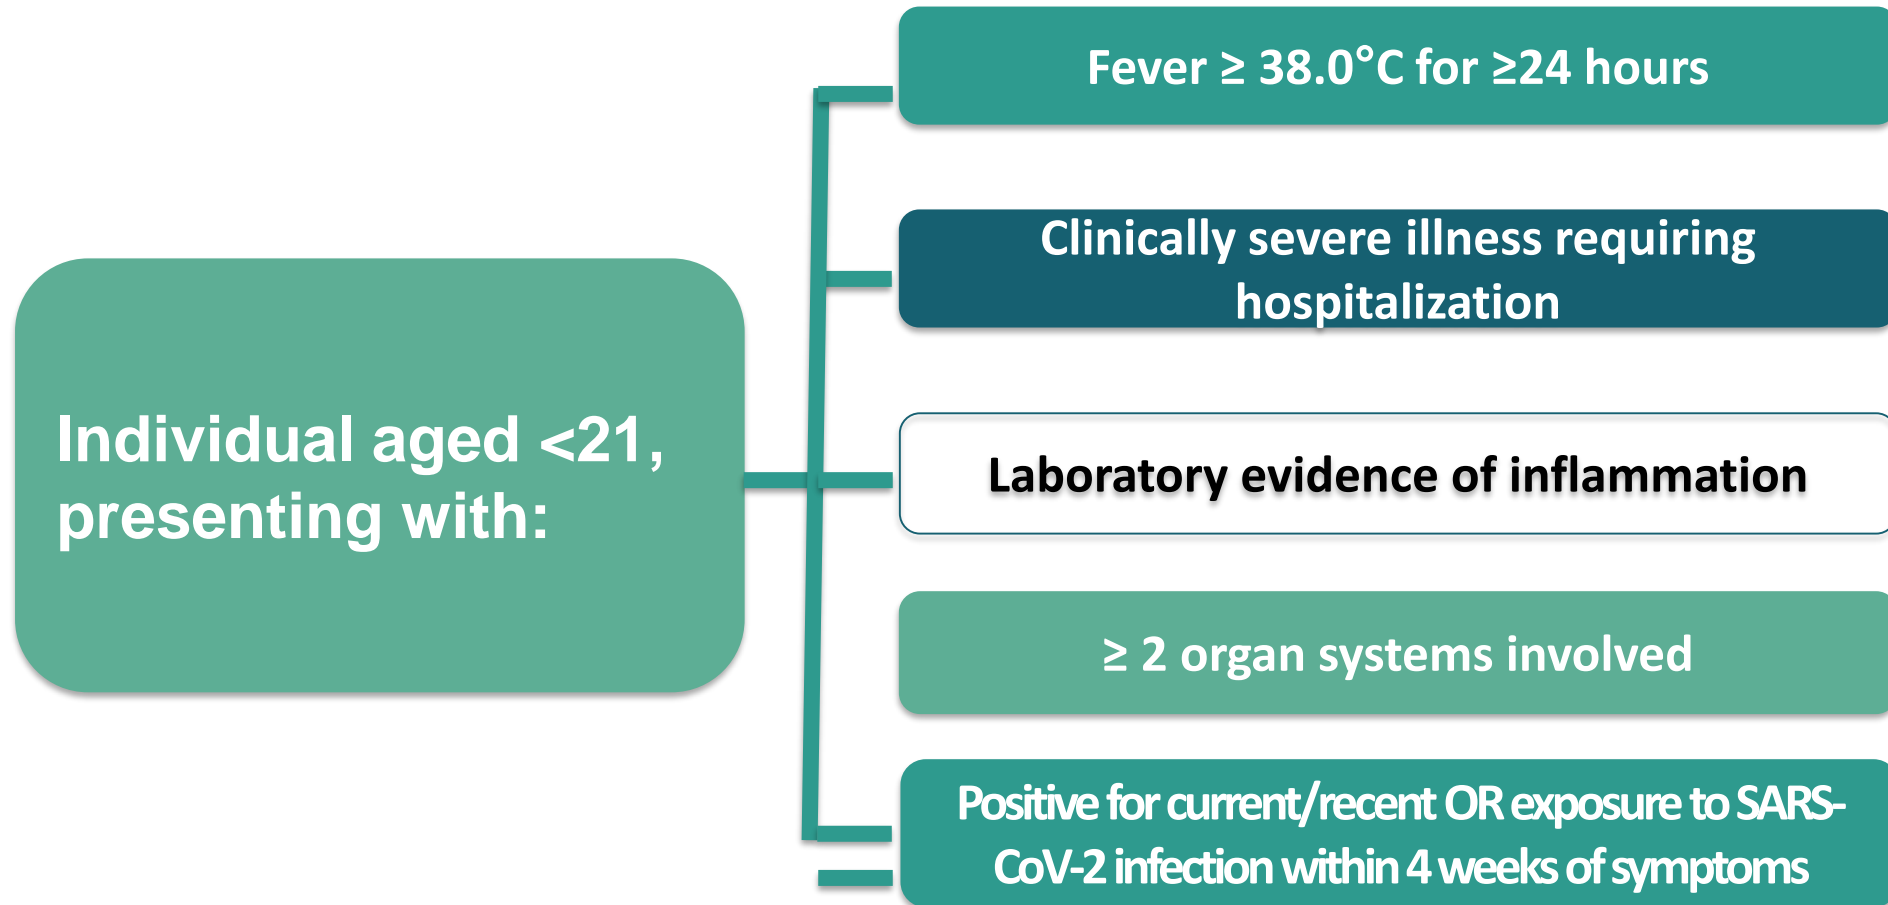

Centers for Disease  
Control and Prevention  
(CDC) published case  
definition

## March 2021

3000 US MIS-C cases  
reported  
36 deaths

(CDC, 2020)

# Multisystem Inflammatory Syndrome in Children (MIS-C)

# Return to Play: Factors to Consider

(AAP, 2021)

***"Medically Ready Force...Ready Medical Force"***

# American Academy of Pediatrics (AAP) Return to Play Guidelines

**Asymptomatic/Mild:** <4 days of fever, <1 week of symptoms

- No exercise until cleared by physician
- Use of 14-point American Heart Association (AHA) screening evaluation
- If cardiac sign/symptom screening and physical exam normal, **no further testing**

(AAP, 2021)

# AAP Return to Play Guidelines

Moderate:  $\geq 4$  days of fever,  $\geq 1$  week of symptoms, or a non-intensive care unit (ICU) hospital stay

Include electrocardiogram (EKG)

If cardiac sign/symptom screening positive  
OR EKG abnormal, refer to Cardiology

(AAP, 2021)

# AAP Return to Play Guidelines

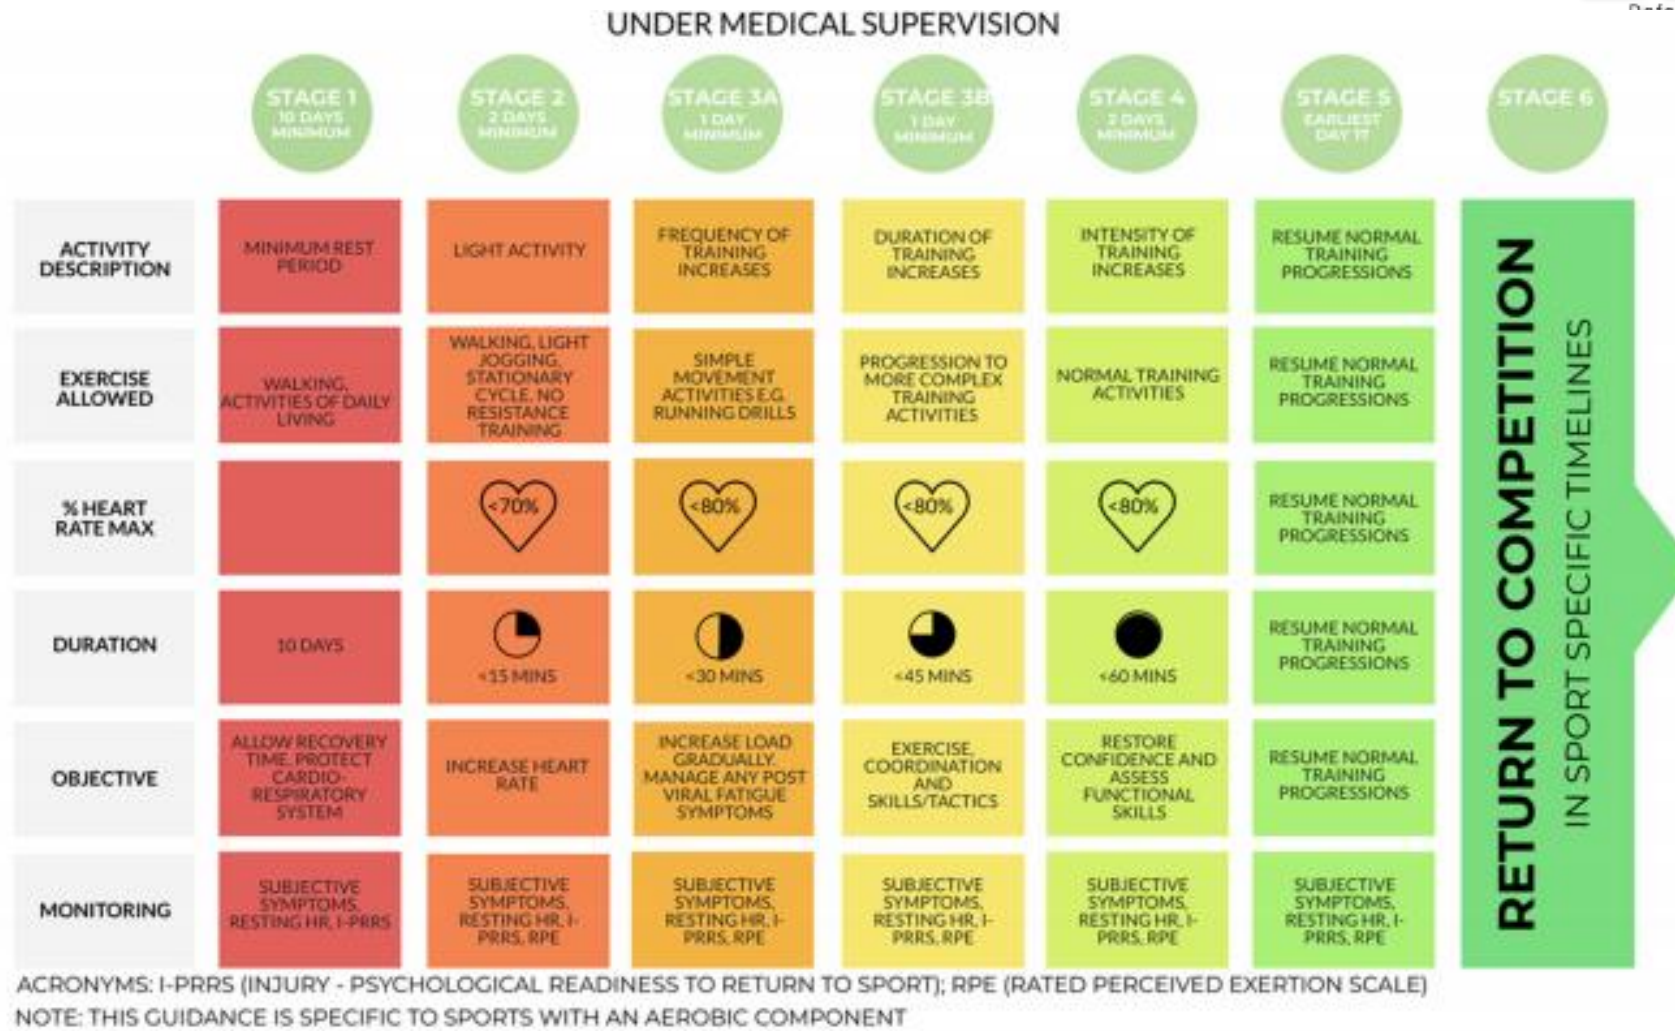

**Severe:** ICU stay, intubation, or MIS-C  
Minimum 3-6 months restriction from  
sports

**Refer to Cardiology for clearance**

(AAP, 2021)

# Graduated Return to Play

(Elliott et al., 2020)

# Key Takeaways

- For safe return to play after COVID infection:
  - ❑ > 10 days from positive test and 24hrs without fever before considering return to play
  - ❑ Mild to moderate symptoms, routine primary care medicine (PCM) clearance with sports physical (+/- ECG), if cardiac concerns arise, consider referral to Cardiology
  - ❑ Severe COVID symptoms or MIS-C, refer to Cardiology for clearance

# How to Obtain CE/CME Credits

To receive CE/CME credit, you must register by 0745 ET on 25 June 2021 to qualify for the receipt of CE/CME credit or certificate of attendance. You must complete the program posttest and evaluation before collecting your certificate. The posttest and evaluation will be available through 8 July 2021 at 2359 ET. Please complete the following steps to obtain CE/CME credit:

1. Go to URL <https://www.dhaj7-cepo.com/content/jun-2021-ccss-exploring-evidence-based-practice-modern-medicine-primary-care>
2. Search for your course using the **Catalog**, **Calendar**, or **Find a course** search tool.
3. Click on the REGISTER/TAKE COURSE tab.
  - a. If you have previously used the CEPO CMS, click login.
  - b. If you have not previously used the CEPO CMS click register to create a new account.
4. Follow the onscreen prompts to complete the post-activity assessments:
  - a. Read the Accreditation Statement
  - b. Complete the Evaluation
  - c. Take the Posttest
5. After completing the posttest at 80% or above, your certificate will be available for print or download.
6. You can return to the site at any time in the future to print your certificate and transcripts at <https://www.dhaj7-cepo.com/>
7. If you require further support, please contact us at [dha.ncr.j7.mbx.cepo-cms-support@mail.mil](mailto:dha.ncr.j7.mbx.cepo-cms-support@mail.mil)
